BONAFIDE CERTIFICATE

Certified that this project report “**DESIGN AND SIMULATION OF SENTINEL GUN ASSISTED BY IMAGE PROCESSING FOR DEFENCE APPLICATION**” is the bonafide work of “**A. AJEETH (920415114007), K. BHARANI DHARAN (920415114027), A. THEIR MUTHU SELVAM (920415114101)**” who carried out the project work under my supervision.

ACKNOWLEDGEMENT

The success of any project depends on the people associated with it. We are indebted to everyone who has made valuable contribution towards the success of the project. We would like to take this opportunity to acknowledge the enthusiasm of all the personalities.

We deliver our sincere thanks to our principal **Dr. ANANT ACHARY M.Tech., Ph.D.**, for having given us the prestigious opportunity of being the member of the institution and also for allowing us to undertake this project work.

We wish to express our heart full of thanks to **Dr. S. SENTHIL M.E., Ph.D.**, Head / Department of Mechanical Engineering, and our project coordinators **Dr. A. ASHA M.E., Ph.D.**, Professor Department of Mechanical Engineering and **Dr. P. NARAYANASAMY M.E, Ph.D.**, Assistant Professor Department of Mechanical Engineering for his valuable comments, suggestions and also for his kind encouragement.

We wish to record our thanks to our project guide **Mr. R. SAKTHIVEL MURUGAN M.E.**, Assistant Professor Department of Mechanical Engineering for his supervision throughout our work. He has been a continuous source and spirit of inspiration in the problem concerned.

We wish to record our thanks to our project co-guide **Mr. T. PALANIAPPAN M.E.**, Assistant Professor Department of Electronics and Communication Engineering for his supervision throughout our work. He has been a continuous source and spirit of inspiration in the problem concerned.

We wish to deliver our thanks to non-teaching staff Department of Mechanical Engineering for their taught how to operate the machines safely.

We thank our parents for their backbone support and motivation. We also thank our friends for their moral support and informative co-operation during the strenuous hours.

ABSTRACT

Every year our Indian soldiers have lost their lives due to sudden terrorist ingress and natural calamities. It should be a great lose to our nation. In order to save the life of our soldier, an autonomous guarding system is to be developed which should save the lives of the soldiers. In this project, a versatile gun holder and automatic aiming sentinel gun is designed with the assistance of image processing technology. Web Camera is used along with the gun holder to capture the live videos. This video is then further analyzed for face detection and tracking. Precise coding is made for face detection and tracking algorithms using OpenCV, Spyder software. The output of face detection and tracking of the captured image sequences is then fed to Arduino microcontroller. In Arduino, the face tracking is coupled with the servo motors which directly controls the Gun for tilting, rotation and triggering. Thus, it could fire the enemies automatically when they come into the range of the camera. This work will be useful for our country in Defense Sectors.

KEYWORDS: Image Processing, OpenCV, Face Detection, Sentinel Gun, Face Tracking.
